

Theory of Change for Development

Learn to use a Theory of Change approach to understand how your development programme contributes to change in a complex social setting.

Caitlin Blaser Mapitsa
Senior Technical Specialist,
CLEAR AA Centre
University of the Witwatersrand,
Johannesburg

Ezethu Mandlelize
Monitoring & Evaluation Officer,
CLEAR AA Centre
University of the Witwatersrand,
Johannesburg

Linda Khumalo
Junior Researcher,
CLEAR AA Centre
University of the Witwatersrand,
Johannesburg

Does monitoring and evaluation seem too technical? Are you grappling with logframes and indicators that don't adequately tell the story of your programme?

A Theory of Change (ToC) approach can help you situate complex social and development interventions. It is both a process and a product for explaining the various contributors to change, and the multiple levels of outcomes that result from programme implementation

This course will provide public and development managers, monitoring and evaluation practitioners, donor agencies, NGOs, academics, and other stakeholders with a toolkit to interrogate the process of change that they are engaged in.

The course will introduce you to theory of change approaches and principles.

It will give you the tools to both understand existing theories of change, and develop your own.

You will also be able to connect a theory of change to logframes and other organisational tools for M&E.

This course will run from 1-19 November 2017. Register at [edX.org](https://www.edx.org)
